

UV-C light devices for air disinfection by ultraviolet radiation.

ADVANTAGES:

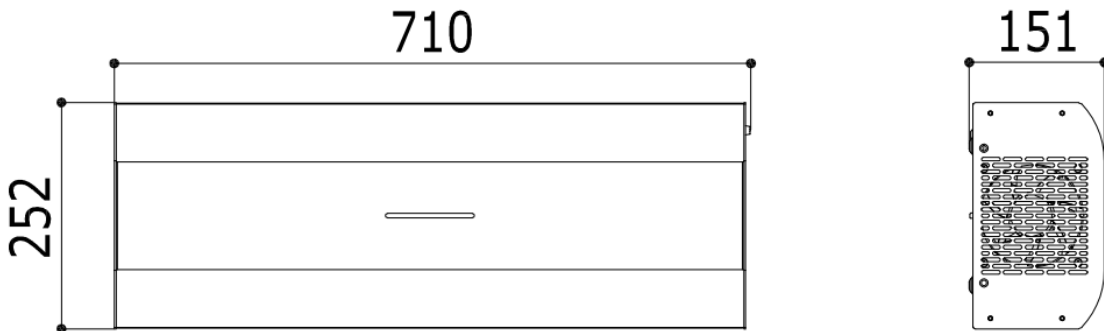

- Highly effective – for a short time disinfects the air in large rooms – up to $90\text{m}^3 \approx 30\text{m}^2$.
- You save time, compared to other contactless disinfection technologies
- AIR STRIKE models does not require supervision during operation
- OZONE FREE - 254nm wavelength, with no ozone emission thanks to the certified PHILIPS UV-C sources
- No harmful emissions and the room can be used continuously
- Easy to maintain
- Use AIR STRIKE models in every room.
- The IKIS team will train your staff and help you integrate UV-C disinfection into the established disinfection processes and protocols.

CHARACTERISTICS:

- AIR STRIKE 90 is safe for use in the presence of humans and animals.
- Designed for use in hospital rooms, operating rooms, clinics, laboratories, pharmaceutical and food industries, offices, retail outlets, schools, kindergartens, homes, etc.
- Compact sizes and modern desing.
- AIR STRIKE 90 models - low operating price and minimal maintenance.

AIR STRIKE 90

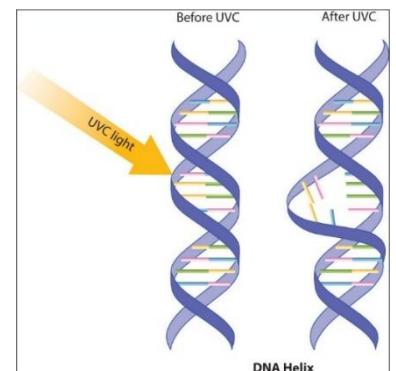

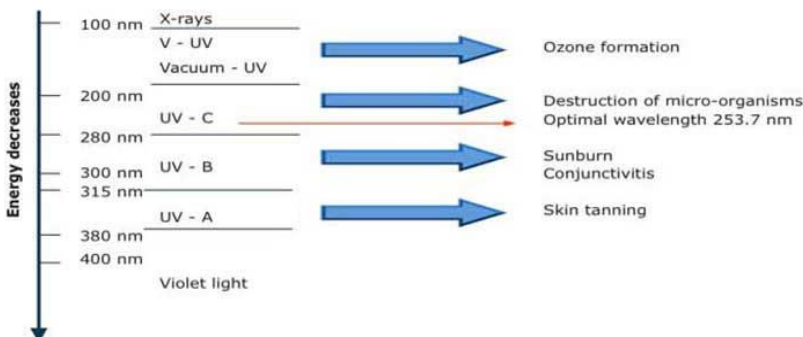

Model AIR STRIKE 90 UV-C is equipped with PHILIPS TUV UV-C 254nm OZONE FREE sources, made of special glass, which filters the harmful ozone-forming 185nm radiation.

Philips TUV PL-L

The UV-C light disinfects surfaces and air through ultraviolet radiation, which helps the disinfection by radiation damage to the DNA structures of all microorganisms – viruses, bacteria, yeast, mould. These surfaces must be exposed directly to the light emitted by the UV-C emitters.

Thus it stops the reproduction of microorganisms. For most cases, UV-C radiation with a wavelength of about 260 nm is the most effective. Mercury contained in light sources produces UV-C radiation in the very close effective spectrum of 254 nm, which has become the standard in the production of bactericidal lamps.

TECHNICAL DATA

CAT. №	Dimensions L/B/H	Weight kg	Power W	PL-L UV-C	EVG
AA4732	710x252x151mm	8	43	PHILIPS	PHILIPS

- HOUSING: STEEL AND ALUMINUM, POWDER-COATED IN BLACK AND WHITE
- AIR DISINFECTION: 90m³/hour
- NOISE LEVEL: 50dB
- BUILT-IN CONTROLLER FOR COUNTING WORKING HOURS AND INDICATION FOR THE STATUS OF THE DEVICE
- SUPPLY VOLTAGE: 220-240V
- PROTECTION: IP20
- CERTIFIED ACCORDING TO STANDARDS:
EN 55015:2013+A1:2015
EN 60598-1:15+AC:15+AC:16+A1:18
- OPTIONAL: REMOTE CONTROL
- OPTIONAL: POWER CANBLE 3m LENGTH WITH PLUG FOR SCHUKO SOCKET
- DEVICE WARRANTY: 24 MONTHS
- UV-C LIGHT SOURCES WARRANTY: 12 MONTHS

NOTE: The lifetime of the light sources PHILIPS 254nm is 9000h by catalogue, after the reach them, then the sources must be replaced.
